

We

about us

We are a dynamic, open-admission, and respected centre of competent professional learning for the Hanover region. We offer many types of education for career-oriented students. These include apprenticeship programmes and continuing education in the metal trades and electrical technology.

We prepare our students for their professional lives, training them in the occupational qualifications that relate to their careers.

We actively take part in training our students to develop career related skills.

We provide students with opportunities for personal enrichment based on regulations agreed by staff and students.

We, the students and teachers, actively show mutual respect.

We expect students to be willing to learn and to expand their abilities to learn.

We treat each other with respect. If conflicts occur we rely on professional help.

We demonstrate responsibility for our actions.

We guarantee that our talented youth will be the workforce of the future. They will also be prepared for advanced studies, particularly in engineering and natural sciences.

We guarantee through continuing dialogue with our partner companies that educational standards remain dynamic.

Our site is easy to reach, centrally located in the region of Hanover.

We offer the optimal use of our resources. We employ these resources in a manner agreed on by faculty and students. We answer to standards of quality management.

We offer professional career education in a cooperative atmosphere of partnership with a faculty dedicated to educating our students. This faculty is constantly improving the learning conditions.

We offer our students the education necessary to achieve every certificate of graduation, from "Hauptschulabschluss" (completion of basic education) to qualification for entry into university-level education.

We open up extraordinary professional perspectives with our rich educational diversity.

We provide opportunities for bilateral cultural and educational exchange via exchange programmes with educational partners in Europe and overseas locations.

We continually offer our personnel opportunities for professional development. We encourage each of our faculty members to develop individual teaching styles according to the principles of academic freedom.

We support parents as they encourage their students' educational efforts.
